

Legacy Fine Casual Furniture to Offer Two Cushion Core Concepts

Monday, January 10, 2011

Legacy Fine Casual Furniture is now offering new cushion comfort styles for their cushion program... Effective immediately, Legacy will make available two cushion core models for purchase. "By presenting two cushion styles, we can allow our design professional dealers to assure their clients the very best in cushion comfort", remarks Gary Parrott, VP Sales and Marketing.

Core Style 1

The first selection will consist of a softer compression "Open Cell" core wrapped in a thinner layer of densified batting and Dacron wrap. Changes have been made to the foam compression and thickness of the layers of outdoor fill. The materials used in this model are made of all outdoor resilient fibers and foam.

Core Style 2

The second variety will feature a soft compression "Interior Foam Core" that has been placed in a heavy duty waterproof barrier material that is used primarily for the medical industry. This model is very comfortable, and primarily used in a "drier climate". There will be an up charge for this particular style.

About Legacy Fine Casual Furniture: Legacy Fine Casual Furniture presents timeless collections of casual furnishings whose elegant designs are selected for either exterior or interior spaces. Developed for both residential and contract use, products may be purchased through one of our interior design or furniture showroom partners located throughout the United States.
